How To Install Python On Windows Platform

Step1: Download the Pyhton

 $\underline{https://www.python.org/ftp/python/2.7.15/python-2.7.15.amd64.msi}$

Step2: Install the python

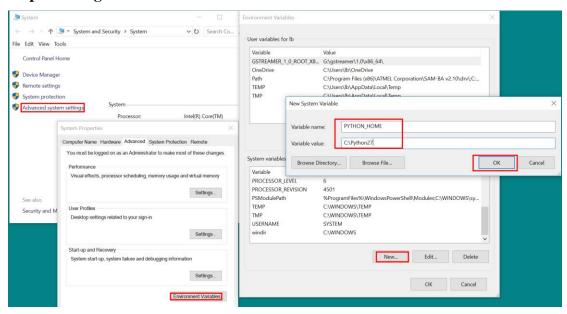

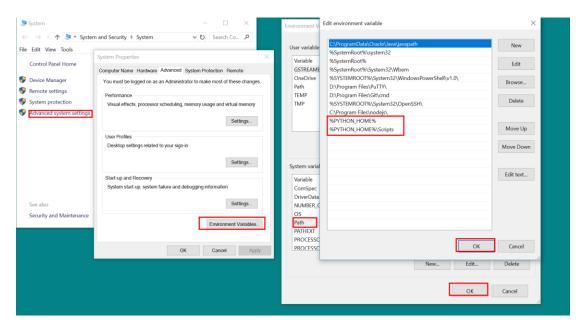

Notice to remember the C:\Python27\ path.Then just click Next in the next steps

Step3: Configure the environment variable

After configure successfully. In the command prompt, input python, then enter You will see the message as the follow image shows:

```
C:\Command Prompt - python

Microsoft Windows [Version 10.0.17134.497]
